

## Data Direct Access Service

The Data Direct Access Service comprises SDH/PDH point to point data circuits. The CP can only use Data Direct Access Service to connect:

- (a) CP Site to End User Site;
- (b) CP Site to CP Site; and/or
- (c) End User Site to End User Site,

where (a), (b) and (c) are within the Hull Area.

The Data Direct Access Service cannot be used for connections which are outside the scope of those identified above, including:

- (a) where the usage is for the purpose of building or extending core network;
- (b) where the intent is to replicate core network; or
- (c) where there is onward connection to a point outside of the Hull Area.

Please refer to the Data Connect Access Service where onward connection is required. Note that, except for the connectivity allowed under this Agreement, the Data Direct Access Service must not be used for directly cabled NTE to NTE connection with any other KCOM provided service. KCOM will not be liable for any incidents, reduction in service performance or service failures which result from the Data Direct Access Service being connected in a directly cabled NTE to NTE configuration or if Data Direct Access Service is connected within the CP Site in a NTE-to-NTE configuration.

### Excess construction charges

Connection Charges below apply to all installations where routing is determined by KCOM and there are no access impediments. Excess Construction Charges, subject to survey, will only be levied in exceptional circumstances such as the requirement for resilient circuits or, for example, requests for termination requiring substantial interior cabling.

### Connection charges

Connection charges are all per circuit.
