

Connect Broadband Fibre Residential Packages

Introduction & summary

The Services are Our 'white label' reseller product that We make available to Communications Providers (CPs) pursuant to the Reseller Agreement for Connect Broadband Fibre Residential Services. The Services enable You to offer fibre broadband services direct to Your residential Customers and gives You control over sales, billing and first line support.

These Package services incorporate KCOM Network access with connectivity. A Customer will still be able to make calls using the Services, but these will either be:

- charged on a pence-per-minute; or
- where You have ordered Calls Bolt-ons on behalf of the applicable Customer, charged at the rate for the applicable Calls Bolt-ons rate.

For the avoidance of doubt, You will be liable for all Charges for calls made by Customers using the Services.

Service description

The Services provide Your Customers with a superfast / ultrafast broadband service using fibre optics nearer to Your Customers' premises to deliver faster broadband services than are normally available over copper based ADSL services.

One of two types of technology will be used to deliver the Services to Your Customers:

- Fibre to the Premises (FTTP) - a fibre installation directly to the Customer's premises (speeds are not affected by distance from the network); or
- Very High Speed Digital Subscriber Line (VDSL) – where fibre is connected to the nearest distribution 'cabinet' and from there to Your Customer's premises, using a copper line. As such, the speed is affected by distance from the network, and is quoted in a similar way to standard broadband as an 'up to' speed. This technology is able to support download speeds up to 75Mbps.

Wherever possible We use Fibre to the Premises (FTTP) technology, to enable Your Customers to enjoy the best possible connection speeds
