

# Reference Offer: KCOM Line Rental Price List

## **Tariff Description**

KCOM Line Rental is a product described in the Reference Offer for KCOM Line Rental documentation and available to those contracted under that agreement. It constitutes a line rental product encompassing analogue lines and ISDN30.

Call services are either provided by default under the Reference Offer for KCOM Line Rental or under a separate Wholesale Calls Agreement. Call tariffs in this Price List apply to the default calls service provided pursuant to the Reference Offer for KCOM Line Rental. CPs should contact KCOM for tariffs under the Wholesale Calls Agreement.

The products under this contract require partner organizations to provide customer solutions which include end customer billing, service support, equipment (where applicable), configuration of equipment and all sundry items necessary to provide a usable service.

KCOM will provide access under the Reference Offer (RO) agreement to the Analogue & ISDN network infrastructure within the original Hull Area as defined in the RO.

### Migration Charges (Including Working Line Take-over and Starting of Stopped Lines)

Migration of an existing line where only the account name and billing details are changed and also for the restarting of stopped analogue lines on take-over (where no visit is required to the End User Premises).

### **Excess Construction Charges**

KCOM new installation charges cover standard installations within the Hull area. Excess Construction Charges may be applied to non standard installations including:

- a) Non-Served Premisesb) A Hot Site

- c) Site Offices d) Ships in Dock or e) Events

Any such work will require KCOM to survey and provide an estimate for the work required.

### **Other Charges**

This charge will apply per event on instructions received to temporarily suspend or to resume service to a previously temporarily suspended circuit.

Service	One-Off Charge (per line/channel)
Temporary Suspension /Resumption Charge  Cancellation charge (New Orders or Migrations)— 2 or more working days after order placed  Missed Appointment Fee*	See Connect Broadband and Voice Miscellaneous Charges

If we have made a scheduled appointment with you for an installation or faults visit, you may be charged a Missed Appointment Fee if an engineer has been despatched to your premises and:

- The appointment is cancelled by you after the engineer has been despatched to your premises
- Person in attendance is under the age of 18
- There is no one at the premises
- There is no one at the premises who knows what work is required/where socket etc. is to be located
- You ask the engineer to call back at an alternative time
- The engineer is refused entry

<sup>\*</sup>Missed Appointment Charges & Expedite charges would still be raised where an Expedite is requested which cannot be fulfilled due to the Missed Appointment reasons above.

#### **Line Rentals**

Lines available on this tariff are Analogue and ISDN30e. Earlier variants of ISDN, not available for new supply but which may be migrated, will be subject to charges at the same levels as current functionality. Line rental charges are per line or (ISDN30e only) per channel and exclude all calls:

**Direct Dialling In** DDI can be applied to one or more lines and allows incoming calls to a PBX to be routed directly to an extension or appropriate CPE without going via the PBX operator. Each DDI number range will be allocated as consecutive numbers and consist of a minimum of 10 numbers.

<sup>\*</sup> Covers up to 10 individual numbers from individual DDI block of 10. If numbers are taken from multiple DDI blocks of 10, then the customer will be charged for the number of ddi blocks affected. For example, 3 numbers from 3 separate DDI blocks, this will be times the above charge.

<sup>\*\*</sup> Note: Where a Customer has a Fibre Delivered Voice service utilised in the Hull Area, Call Waiting is not available.

<sup>#</sup> Visit charge where applicable applies

ISDN30e sub addressing: Connection charge is per event and rental is per channel per month

Calling Line Identification Presentation CLIP This service is automatically provided by the network to the called party (even for ex-directory numbers) and enables the called party to receive the line identity of the calling party. If DDI or MSN are used, the calling user (depending on the type of CPE) may provide the DDI or MSN digits only or the full ISDN number. Where the calling user does not provide the DDI or MSN digits, the network will automatically insert a default directory number which will normally be the number used for billing purposes. If sub-addressing is used, the calling party sub-address will only be delivered if both calling and called parties are using ISDN.

Calling Line Identification Restriction CLIR This applies to outgoing calls and prevents the release of a caller's line identity. Callers are, by default, able to prefix the called number with the digits "141", to restrict CLI presentation on a call by call basis. As an alternative, a customer can request automatic restriction of their line identity for every call. In this case, by prefixing the called number with the digits "1470" callers will be able to override the restriction (thereby releasing their line identity) on a call by call basis. This service is independent of the Connected Line Identification Restriction (COLR) service.

Connected Line Identification Presentation COLP This service is automatically provided by the network to the calling party (even for ex-directory numbers) and provides the calling party with the possibility to receive the line identity of the connected party. If the call has been subject to call forwarding, it is the connected number and not the called party number that is provided to the calling user. If DDI or MSN are used, the calling user (depending on the type of CPE) may provide the DDI or MSN digits only or the full ISDN number. Where the calling user does not provide the DDI or MSN digits, the network will automatically insert a default directory number which will normally be the number used for billing purposes. If sub-addressing is used, the calling party sub-address will only be delivered if both calling and called parties are using ISDN2e.

**Connected Line Identification Restriction** COLR This applies to incoming calls and prevents the release of connected line identity to a calling party. This service is provided on request. This service is independent of the Calling Line Identification Restriction (CLIR) service.

**Incoming Calls Barred** ICB This service is provided on request by KCOM and prevents all incoming calls.

**Outgoing Calls Barred OCB - Permanent** This service is provided on request by KCOM and enables the user to place restrictions on the destinations to which outgoing calls may be placed. The service is available on a permanent basis only (Admin OCB). See the call barring for the categories of outgoing call barring. Admin OCB prevents users from making outgoing calls. The calls can be split into different categories, which are: Local calls, national, international, operator services or premium rate numbers.

#### Outgoing Calls Barred OCB - Pre-arranged

**Call Forwarding (Admin. controlled only) - Unconditional** CFU This group of services enables calls to be redirected to another telephone number under the following conditions: Unconditional (CFU) - All calls are forwarded by the network to the pre-selected ISDN number. The customer can still make outgoing calls.

**Call Forwarding (Admin. controlled only) - On Busy** CFB - Incoming calls are forwarded by the network, to a pre-defined ISDN number, when the user is identified as being busy.

**Call Forwarding (Admin. controlled only) - No Reply** CFNR ) - Calls which are not answered within a specified time are forwarded by the network, to a pre-defined ISDN number. The diverted leg of the call will be charged to the customer who invoked Call Forwarding. ISDN2e will allow 64kbit/s data calls to be

P13 S26 Version 13 16<sup>th</sup> May 2025 Page 5 of 20

forwarded in addition to speech calls.

**Extension Socket** One fitted as standard up to 10 metres from the main socket

Further extension sockets at the same location when installed at the same time as the first. Extensions over

10 metres from the main socket are subject to a quote following a technical survey.

Internal move of existing extension socket (within 10 metres of the main socket)

Internal move Of master socket

**Note 1**: KCOM reserves the right to charge a fixed fee of £32.00 exc. VAT , where applicable, for any changes to data facilities requested by the customer after the service has been installed.

**Note 2**: An £12.00 exc. VAT admin fee will be charged each time a request is made for change to the number calls are being diverted to.

**Note 3**: This service will be provided via a C-Mux and is not suitable for high volume incoming traffic. + A visit charge will apply, see the time related charges section for this. In addition to the charges above, a one-off payment of £3,150.00 Ex VAT will be charged for provision of Fibre if no Fibre currently exists.

**Type 5 Presentation Number**: Please note that only one presentation number per ISDN30 circuit is possible. Where Type 5 presentation has to be applied, or removed and reapplied, then the customer will be charged as above to reflect changes to existing configuration on ISDN30e services. The application of Type 5 Presentation requires the customer to sign an agreement which confirms they will comply with legal requirements embodied in the Ofcom Code of Practice concerning the ownership and ability of the requested presentation number to receive calls. A presentation number must not be a number that connects to a revenue sharing number that generates an excessive or unexpected call charge. KCOM customers are required to sign such an agreement upon their request for Type 5 presentation.
