

Wholesale Ethernet Assured Service (EAS)

Service Description

Wholesale EAS is a reseller variation to the retail KCOM EAS service. This is an Ethernet based Virtual Private Network (VPN) that enables a customer to offer Ethernet based connectivity with Public Sector Network (PSN) compliance. KCOM provides the delivery platform, provisioning, installation, billing and fault management to the customer.

The service includes Layer-2 Access Circuits between end customer sites and KCOM Points of Presence. The service is available over KCOM provided Ethernet circuits within the Hull Area (i.e. the Original License Area (OLA)) and can be provided by KCOM outside the Hull Area.

Connectivity between the KCOM Point of Presence and the Communication Provider's (CP) nominated site is provided using a 1Gbps or 10Gbps Aggregate Access Bearer. Where a CP's site is outside the Hull Area a backhaul bearer is also used.

Site-to-site connectivity is provided using Ethernet Virtual Connections on the Aggregate Bearer.

For interface specifications and logical configuration see the Customer Interface Publication (CIP), which sets out the technical characteristics of the service. KCOM EAS CIP 034 can be found at: <https://www.kcom.com/wholesale/products/service-information/technical-interface-information/>

Connection Charges

The Wholesale EAS service has a range of Access Circuit connection options:

Standard – an Access Circuit with no resilience.

Resilient Diverse – two Access Circuits to the same customer site that connect to different KCOM exchanges but share the same duct into the customer premises.

Resilient Fully Diverse - two Access Circuits to the same customer site that connect to different KCOM exchanges and use different duct access into the customer premises.

We will provide you with an AM or PM appointment for the installation of the circuits. Missed Appointment charges apply for any missed installation dates when you or your customer is not available to provide access.

Notes:

a From 01/09/2023 connection charges are no longer dependent upon status of existing connectivity

Replacement Hardware Charges and Upgrades

We will provide hardware to you, for you to use with the Wholesale EAS service, you acknowledge that any free hardware provided shall remain the property of KCOM. If the service is cancelled you must allow us access to the premises to collect the hardware, if required.

You and your Customer must take reasonable care of the hardware whilst it is at the premises and, in particular, must protect it from accidental damage and theft. In addition, you must not allow anyone other than us to carry out any repairs or maintenance work on the hardware.

You will be responsible for the cost of repair or replacement hardware if it is lost or damaged as a result of accidental damage or you failing to take proper care of it. However, we will be responsible for any problems you experience with the use of the hardware that can be attributed to any defects with the materials or manufacture. We will repair or replace any defective items free of charge within warranty. A service charge to replace the NTU incorporating the Engineer site visit reconnection charge. The replacement NTU remains the property of KCOM.

You will be charged for any missing equipment that cannot be recovered by KCOM when the service is terminated.

|---------------------------------------|--|
| | Ex VAT |
| Reconnection fee – Internal shift | Subject to survey |
| Reconnection fee when moving premises | As per New or Existing Fibre charges above |

Cancellation Charges

Please refer to the Cancellation Charges price list.

Early Termination Charges & Notice

The Termination Payments are defined in the customer contract. They shall not exceed 100% of the aggregate annual charges paid, due or would have been payable under this service in the 12 months preceding the event giving rise to the liability (or if such event occurs during the first 12 months of the Term, the amount estimated to be paid in the first 12 months of the Term). A 90 day notice period of termination is required.

Excess Construction Charges (ECCs)

KCOM leased line pricing incorporates standard connection charges for single circuits, dependent upon whether there is existing fibre installed or fibre needs to be installed at the site. Wherever there is fibre installed at the site, this will be utilised and no further charges will be raised. Standard charges apply for new installations where fibre must be installed at the site and this is readily provisioned from nearby network. When an order is taken additional charges may be applied in various instances including the following:

- (a) Resilience is requested, dependent upon the level of separacy required;
- (b) Client site is a significant distance from established KCOM network;
- (c) Exceptional costs are identified e.g. a new crossing of a railway line.

KCOM will absorb the first £2,800 of ECCs. Note that exemptions will NOT apply where:

- (a) Time Related Charges are incurred for out of hours working
- (b) Circuits are alternatively routed at the CP / End User's request
- (c) An exemption has already been given at the site on an earlier occasion

Costs will be charged as an ECC where they exceed the exemption threshold of £2,800. The ECC is in addition to the published connection fee. In all instances rentals will continue to be at standard published rates for each circuit type, regardless of whether ECCs have been incurred in construction.

No Longer Available for New Supply
