

Connect Broadband Fibre Residential Bundles

Introduction & summary

The Services are Our 'white label' reseller product that We make available to Communications Providers (CPs) pursuant to this Agreement. The Connect Broadband Fibre Residential bundles brings together your phone and superfast broadband or Ultrafast broadband services with inclusive calls, in one convenient bundle. This document shows details of these bundle services.

Service description

Based on fibre optic technology, these services provide superfast internet access with a more reliable connection and faster speeds than standard broadband. There are two types of fibre services that we use:

- **Fibre to the Home (FTTH):** This carries the fibre all the way into your home and speeds are not affected by distance from the network; and
- **Fibre to the Cabinet (FTTC):** Sometimes called 'VDSL' this is where fibre is connected to the nearest distribution 'cabinet' and from there to your home, using a copper line. As such the speed is affected by distance from the network, and is quoted in a similar way to standard broadband as an 'up to' speed. This technology is able to support up to 75 Mbps.

Based on fibre optic technology, the Ultrafast internet access services can only be provided using Fibre to the Home (FTTH) technology. This carries the fibre all the way into your home. Wherever possible we use Fibre to the Home (FTTH) technology, to enable customers to enjoy the best possible connection speeds.

Contract term

The standard contract length is 18 months for these Connect Broadband Fibre Residential services.
